BIODERMA LABORATOIRE DERMATOLOGIQUE

1 patients out of 2 OF RENAL FAILURE PATIENTS

HAVE AT LEAST ONE DERMATOLOGICAL COMPLICATION*

And what about you?

ECOBIOLOGY AT THE SERVICE OF DERMATOLOGY Learn more about NAOS, French ecobiology company founder of BIODERMA, on www.naos.com

ON YOUR SIDE SUPPORTED YOUR WEAKENED SKIN

Taking into account skin ecosystem, Laboratoire BIODERMA had **specifically developed** dermocosmetic products to address the needs of skin weakened by treatments (chemotherapy, radiotherapy,...) and pathologies **(cancer, diabetes, renal failure)**.

MEDI-SECURE APPROACH

To develop **safe & efficient** products taking into account the specificities of skins weakened by treatments and pathologies.

Carefully selected ingredients

and active ingredients that are recognised by health professionals to guarantee optimum safety

Guaranteed results backed by clinical studies under medical and oncological supervision

Practical and hygienic packaging to facilitate use and improve daily life

The skin represents a **dynamic ecosystem**, in interaction with its environment. However, this ecosystem is fragile and can, during certain treatments be **unbalanced**. Indeed, certain characteristics of the skin make it an organ specifically and frequently affected **during treatments or pathologies**.

Early intake is recommended to avoid worsening of symptoms.

850 million people worldwide **are affected by kidney disease**⁽¹⁾ +50% of renal failure patients have at least one dermatological complication⁽²⁾⁽³⁾

WHAT IS XEROSIS?

Xerosis is the medical term for abnormally **dry skin**. This name comes from the Greek word "xero," which means dry.⁽¹⁾ Xerosis is the most frequent skin manifestation in dialysis patients. Among patients with chronic renal failure, it has been suggested that those on dialysis have the most skin dryness.⁽²⁾

Symptoms:

Dry skin can be **rough, flaky, red**, and sometimes painful. It's often caused by not having enough oil and water in the layers of the skin.⁽³⁾

> in chronic renal failure patients suffer from xerosis⁽⁴⁾

DAILY ADVICE⁽⁵⁾

Dry yourself gently to avoid damaging skin.

Apply skin care cream once at twice a day and within 15 minutes of showering.

Cut your nails to avoid scratching.

Avoid scrubs which damage the skin.

Avoid long bath.

Do not wash with overly hot water.

MEDI-SECURE APPROACH

respects NAOS ecobiology principles to better preserve the skin ecosystem and to strengthen its natural mechanisms. Rather than over-treating the skin, it must learn how to function properly.
